Mar del Plata, Argentina · [LinkedIn](#) · +54 223 545-7365 · [geronimogonzalezmartino@gmail.com](mailto:geronimogonzalezmartino@gmail.com)

Full stack developer and founder of CompraAcá, a web-based ordering platform focused on local businesses and entrepreneurs, where I fully design and develop the system architecture, business logic, and user experience. I focus on building scalable and efficient solutions by applying best practices, performance optimization, and decoupled architecture.

I also participated in the development of the job board for the National Technological University, working in a Scrum-based team, performing requirements analysis, backend development with Spring, and deployment in a private environment.

I am interested in building solid, well-designed, and technically robust products, prioritizing security, maintainability, and user experience.

## PROFESSIONAL EXPERIENCE

---

### UTN Empleos

Full Stack Developer

Mar del Plata  
June 2024 - Present

- Performed requirements analysis based on IEEE 830, adapted to client needs.
- Developed the application's business logic using Spring.
- Integrated Google Drive to store students' CVs in an accessible location.
- Used MySQL for database management, ensuring data integrity.
- Improved the responsive design of the website, enhancing user experience across devices.
- Applied Scrum for agile project management.
- Deployed in a private environment using Apache Tomcat and Nginx for internal testing and future release.
- Implemented user authentication and role management with JWT.

### CompraAcá

Founder & Full Stack Developer

Mar del Plata  
January 2025 - Present

- Built the user interface using PrimeNG.
- Managed application state with NgRx.
- Implemented real-time order notifications using Server-Sent Events (SSE).
- Managed image uploads and downloads with AWS S3.
- Handled email delivery using AWS SES.
- Implemented Redis caching to improve response times.
- Implemented distributed messaging with RabbitMQ to prevent API thread saturation.
- Managed the database using AWS RDS.
- Deployed the application on EC2.

## Universidad Tecnológica Nacional

Teaching Assistant (Programming III and IV)

Mar del Plata  
March 2025 - Present

- Assisted students in solving technical problems related to Java, Spring, HTML, CSS, JavaScript, and Angular concepts.
- Delivered classes explaining the resolution of practical assignments to all students.
- Evaluated assignments and exams, providing feedback on performance.

## EDUCATION

---

### Universidad Tecnológica Nacional

University Technical Degree in Programming  
GPA: 8.95

Mar del Plata  
February 2025

## ADDITIONAL SKILLS

---
